Just installed a mobo and drives in one of these along with at very quiet PSU. Nice case. All HD slots are shock mounted. Big fans that can be set to low RPM and still have plenty of airflow. It's quiet enough for control room duty.

DJ, how big is the PCI slot area, could an EDS fit length wise in there? I got a silent case last year, I forget the model now, but the EDS card was like 1/4" too long so I ended up returning it.

Thanks
Rob

HI DJ,
yes those case to pretty darn good. We've had them as an option on our system sense they came out. They are prone to having the front broken off in shipping but otherwise a good diy case.

Hi Robert,
If I remember correctly it will not fit a full length card like the EDS.
