I have a friend with the below scenario. What should he be looking for?

My wife will be an absolute beginner, so I am looking for a rather expensive way for her to try, best with a used instrument.

Nonetheless, I do not want to go for any of these dirt-cheap Chinese or Indian imports, as they just sound horrible and make things even harder for a beginner.

I was thinking of either Yamaha or Jupiter (and Conn or other US brands should also work). It should be tuned in Bb. Double horn with F/Bb would also be possible but would probably be more expensive.

All said, I was thinking to spend less than \$1000.
