Anyone ever hear these? I've heard the smaller B&W's (DM-series, I think), and the really f*cking super high-end ones that look like R2D2 with a tweeter on it's head, but not this series... anyone ever use them?

I ask because I was out running errands today & noticed that a local hi-fi place has 701's (not hooked up, though) and the price seemed reasonable - \$799 each. (well, reasonable for that level of quality, from what I've heard of their other stuff).

Anyone?

BTW, Deej - when I was out & about, I was able to find exactly ONE half-rack-height spacer... no vents, jsut a solid spacer. I grabbed it in case you can use it -I don't even know if one is even worth shipping, though - lemme know if you can use it, otherwise I can always just return it.
