has the process of installing Paris on XP been simplified into a solid, re-produceable, step-by-step process?

i am wanting to do it on an old A7N8X-e with an XP2800.

best,

jeremy

I believe it's just:

run the setup app to install the scherzo drivers, reboot, then install Paris, reboot, then the effects subsystem, then reboot.

sorry its been a long time since i have had to re-install paris.

i don't remember a setup app to install the scherzo drivers or what the effects subsystem is.

would you guys mind refreshing my memory.

thanks.

Jeremy please pay very close attention when installing the FXsubsys as it installs to an extra folder, by default. This will cause Paris to behave screwy, so it is up to you browse to the correct folder, when you install it.

Regards,

EI Miguel
