All,
I am considering going to Paris V3.0 because of the amplitube problem I =
mentioned earlier so I downloaded the demo on a brand new computer with =
Windows XP SP2 and when I tried to run the Paris 3.0 demo it did =
nothing. Literally nothing. It was like I hadn't even tried to start the =
app. Anyone seen this? Got any suggestions?

Thanks,

--=20

Did you follow the instructions for loading in Paris Beta Windows XP =
drivers 'exactly', including updating the PACE drivers before loading =
the Paris software?

You might also check that Data Execution Prevention in Windows XP is not =
causing you problems.=20
