---

I'm pretty green on the external clock deal but here it goes.

I will be getting an RME 9652 HDSP soon that will be installed in the same i7 box as my 3 card Paris sys.

Can/should I use the RME as master clock out to my 2 MECs? Would I gain anything sonically?

Can I still use Paris as the transport master while slaving Reaper via ADAT 9pin sync?

Thanks

Cheers

Rob
