Subject: .wav to .paf
Posted by mattcelt on Fri, 11 Mar 2011 06:35:24 GMT

Hey guys, it seems that pafwavconvert has gone AWOL from Doug's site, and I didn't realize I only had the 98/ME version in my PARIS utilities backup folder. Can someone send me the XP version?

I can't get AutoTune 5 to work in PARIS at all (in either auto or graphical mode), so I'm importing the PAFs to Reaper (which works amazingly, btw) and 'Tuning them there. But Reaper can't output to .paf yet, so I'm stuck having to convert them externally to get them back in PARIS.

(I know I could just import them as .wav files in PARIS, but I'm trying to fool it into thinking they're still the original files so I don't have to re-edit them into the project.)

Thanks much!
Matt
