Hi Stephen,

I'm using one of these:

 http://www.virtuavia.eu/shop/pcie-4-x-pci-expansion-atx-kit. html

No PCI bus necessary.

I'm also using an AMD setup:

 http://kerrygalloway.com/ParisForums/index.php?t=msg&th= 15446&start=0&

As for XP vs. Windows 7, XP support ends in April, so it won't be safe to put it on the Internet after that. Also, it lacks trim support for SSD disks, so they wear out faster.

More than anything, though, I find 8GB of RAM wonderful for overall system performance.

I hope this helps.

Mike
