Happy New Year all

I am at a point where it would be a good time to set up a PARIS rig for myself

Looking for all required hardware to integrate with a 32 channel analog console

I have both Mac and PC available for running it and have a control surface as well

Just throwing this out there to see if there are any bites

Thanks!

I still have all my stuff for sale - my classified is one of the more recent. I haven't used it in probably 10 years. Don't know if that's good or bad, but it was all working fine when I moved on. Make me an offer. It's better off with someone who will actually use it. Shipping from MA.

Thanks for your reply!

Do you have any pictures of everything?  
Also do you have the original boxes?

Thanks

Michael

Hah.. The MEC was in my rack - that was easy.. The Controller and Interface 2 were in storage and my wife and I had just done some organizing a couple weeks ago - you know what that means! I couldn't find them. Of course, I finally found them - right where I put them, LOL. I posted a big pic so you can see everything is in very good condition. Let me know if you want additional photos. PM me and let's work out details - I'd just assume this gear finds a happy home where it actually gets used.
