Anyone want a Roland Space Echo? No, not the UAD-1 plugin, but the REAL DEAL. With a loop of tape and everything!

It sounds great, though I think the tape needs to be replaced soon.

I saw two on ebay recently, one in not good condition for about \$175. One in great condition went for nearly \$350. I'd say this is in between. Like I said, it needs a tape, but it's always worked perfectly. The cover isn't in good shape, as the previous owner thought that duct tape was better than bolts for keeping the lid closed. But when I had it serviced a few years ago, I had proper bolts put in.

So... Asking \$175 to \$350. :)Is this not a valid place to download it for free?
