> >Hehehe...........no pain, no gain........right? ;o) I've been reloading all
of my programs today. this thing is monstrously powerful. It's not even
breathing hard doing things that would have brought my single core XP 3000
to it's knees. Now that it's up and running, I'm thinking that every bit of
this was worth the trouble......I used my existing HD's, floppy, DVDR,
cabling and video cards so this beast only cost me the price of the OEM
mobo, CPU and RAM........around $700.00 and it's like a whole'nuther world
here now!!!!!

;oD
