
Subject: Paris on xp and waves.

Posted by [Slavii](#) on Tue, 10 Jul 2007 00:54:39 GMT

[View Forum Message](#) <> [Reply to Message](#)

I have just upgraded from paris 3.0 running on an old computer running win 98 to a new computer running xp. My problem is I have the waves gold bundle version 2.0 which will not run on xp. I talked to waves and they say they don't have a current version of the gold bundle that will run in paris. Is this true? Does anyone have any ideas?

This was the response I got from the people at waves. Does anyone have ideas ? I would hate to have to run win98 on my brand new computer.

"Waves 3.2 was the last version tested here to work with Paris. However Waves 3.2 will not work on Windows XP. Paris no longer released any further updates for their product while Waves was at version 3.0.

Also as mentioned on the phone, Wave no longer can sell or authorize version 3.x products. You can try out the version 4 from our website, which is compatible with Windows XP, however from what we have seen, this will not work with Paris".

Steve,

I had very good luck with Waves tech support. I have their Gold Bundle =
3.6
working flawlessly on XP with Paris. They had to walk me through a =
bunch
of numbers to input but it was painless 'once we got down to it'.

Neil,
Ya, now that you mention it me too. Not really a big problem though.
T.
"Neil" <OIUOIU@.com> wrote in message news:46946a84\$1@linux...

I had the Gold Bundle 2.0 working fine on Paris v2.2;
I was running Win98SE at the time.

Dunno if that helps any. Only issue I had was that you had to
mute the track before the audio came in, otherwise you'd hear
a "POP!" right where the track started - this is a fairly common
Waves/Paris issue, though, from what I understand.

Neil

compatible with Windows XP, however from what I have seen, this will not work with Paris". I have just upgraded from paris = 3.0 running on an old computer running= win&98 to a new computer running xp. My problem is I have the waves gold bundle version 2.0 which will not run on xp. I talked to waves and they say they don't have a current version of the gold bundle that will run in paris. this is true? Does anyone have any ideas? </BLOCKQUOTE>

Back in the day, there were many problems with native plugins and Paris with Waves. There were also issues with the TC native plugins, too. Each time I went to Edmund about it, he stated it was these other companies didn't code their software properly. That's odd, because they worked in my PC Logic Audio system as well as Wavelab and Soundforge back then. Yet Paris was the ONLY application they all had issues with, so this is nothing new unfortunately.... Wow, has it really been 10-years since I bought Paris????? woah!
