Subject: Motorized faders - touch sensitive or not?

How many of you are using some kind of motorized fader device? Does it have touch sensitive faders?

I've got my initial design done and I'm trying to finish up my prototype of a 16 channel motorized fader control that will have both MIDI and EDS serial connections on it. :-) I have the chance to get either touch sensitive or non-touch sensitive faders, but the touch sensitive ones are twice the price. :(

Now, if I was making a completely self-contained mixer, I'd go for the touch sensitive faders, but since this is basically a remote control that may or may not talk to an application that understands touch faders, should I bother?

Doug
