gt;yo Dimitrios,

I am interested in your Magma. I am in the U.S.A. Can you explain the
condition of your Magma. Would i need to get an USA power supply?

I don't have anything to trade. I would like to buy only the Magma.

here... Did you install the winXP effects patch 'exactly' as directed. If so and you still do not have them my guess is you did not install paris to the stock folder/directory. Uninstall it, then reinstall watching CAREFULLY that the right folder that the paris.exe is in is where the patch installs to.

Thank you for your proposal.
For now I just can use Mec EDS card and ADAT card.
I have no need for 442, C16.
Thank you

Jeremy,
\the cost for sending the chassis to US is high.
This is the PCI-7-RX Magma consisting P7B backplane, PCI EXP 2.1 and PCI
Host 2.1 plus the cable.
How much would you pay for these excluding the chassis ?

Dimitrios
