Or does anyone have good companies that may stock these older guys?

The one I'm looking for reads:

fP94AD

DM74LS =20

244WM

The results I've gotten so far aren't perfect matches.

I know it's unlikely but it's worth a try.

Thanks for anything you can add.

Tom

I'm not sure about the DM, but the 74LS series chip is pretty common TTL =
logic gate as I recall. Try getting specs at national semiconductor.=20
Have you looked at the usual suspects yet?

Radio Shack

Mouser

Digikey

MCM Electronics

Jameco
Newark
ECG

Aaron,
Those three numbers came from the same chip.
Should I ignore the top and bottom numbers?
The middle one is DM74LS
This is great information! I will dig a little deeper now.
Thanks,
Tom

Aaron,
Digi-Key was the place to go.
The chip is no longer made by Fairchild
but they had a pin for pin replacement for .88/pc .
I got ten just in case all three of my Mecs need
both replaced.

I hope this solves the whole problem.
Huge thanks to you my friend,
Tom

Fairchild??? So if I stick this in a simple i/o hot/cold wire
in a metal kit box from Radio Shack, will it sound like a 670?

:D

Now I know why Paris sounds so good--it comes with a Fairchild built in...this could be really good marketing...:)

Thanks Aaron,

I'm not doing it. I have my tech guy with experience to do the dirty work. I'm just watching over to learn.

Imagine a Fairchild for .88 . The glory of it all.

Tom

"John Macy" <spamlessjohn@johnmacy.com> wrote in message = news:4704e4e9\$1@linux...

Now I know why Paris sounds so good--it comes with a Fairchild built = in...this

could be really good marketing...:)

those are static sensitive chips. Take proper precautions installing/handling them or they could be damaged installing. If you're not sure of the procedure, shoot me a private email.

Tom Bruhl

arpegio@comcast.net wrote in message <news:47045fb4@linux>...

Aaron,

Digi-Key was the place to go.

The chip is no longer made by Fairchild but they had a pin replacement for .88/pc.

I got ten just in case all three of my Mecs need both replaced.

I hope this solves the whole

problem.</DIV>

I'm not sure about the DM, but the 74LS series chip is pretty common TTL
logic gate as I recall. Try getting specs at national semiconductor.
Have you looked at the usual suspects yet?

Radio Shack
Mouser
Digikey
MCM Electronics
Jameco
Newark
ECG

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message

Or does anyone have good companies that may stock
these older guys?

The one I'm looking for reads:

fP94AD
DM74LS
244WM

The results I've gotten so far aren't perfect matches.

I know it's unlikely but it's worth a try.
Thanks for anything you can add.
Tom

Mike,

At Digi-Key it is called SN74LS244DW. .88 a piece.

In the Mec master module there are two of these and there they are =
called

fP94AD (f for Fairchild as I understand it)

DM74LS

244WM

Tom

"Mike R." <emarenot@yahoo.com> wrote in message news:4707834d@linux...

Hey Tom,

Found the digikey site, but I'm unsure what part numbers to reference. =

Could you post the part number of the replacement chip?

Thanks,

MR

news:47045fb4@linux...

Aaron,

Digi-Key was the place to go.
The chip is no longer made by Fairchild
but they had a pin for pin replacement for .88/pc .
I got ten just in case all three of my Mecs need
both replaced.

I hope this solves the whole problem.
Huge thanks to you my friend,
Tom

"Aaron Allen" <know-spam@not_here.dude> wrote in message =
news:47042dd9@linux...

I'm not sure about the DM, but the 74LS series chip is pretty =
common TTL logic gate as I recall. Try getting specs at national =
semiconductor.=20

Have you looked at the usual suspects yet?

Radio Shack
Mouser
Digikey
MCM Electronics
Jameco
Newark
ECG

AA

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:470417bf\$1@linux...

Or does anyone have good companies that may stock
these older guys?

The one I'm looking for reads:

fP94AD
DM74LS =20
244WM

The results I've gotten so far aren't perfect matches.

I know it's unlikely but it's worth a try.
Thanks for anything you can add.
Tom
