Hey Chris....I sent that file that you gave me last week over to my buddy.
(this is the guy I built the comp for last year..used the shopping list
you gave me)I coached him'over the phone, how to install it, according to
your instructions.
Apparently it still didn't work. It my just be that he still didn't do it
right, but I was just checking. This will work in Cubase as well as in Wavelab,
right. (I've used this file in Wavelab before). Again, thanks for your help.
