I'm not sure how they do it, but the Dell in my office is really quiet - one
of the quietest machines I have heard. You couild check their fans out
somehow.

It's more than just the fans, the entire chassis is designed and built by a
specific facility 'just' for keeping things quiet. Dell has gone to great
lengths on this particular.

View Forum Message <> Reply to Message

I'm running an old Power PC UMax SuperMac S900 and a new-to-me G4. The G4
has a 1.7 Ghz Sonnet Encore ST G4 upgrade. I moved into a very small place,
so the studio is (for now) stuck in a small bedroom. No machine room, not
even a closet to stick the 'putes in. I'm thinking about building a big box
out of thick dense foam wall board, but I'm thinking some quieter chassis
fans would help too. I googled "super quiet fans," but very little popped
up. Anybody out there found a useful solution?

Thanks.

Yep. It's got to be physical separation of computer from critical space.

I cut a small hole in the wall to run the cables through and put the computer
in the next room.

I spent a whole lot of $ buying "quiet" fans that were never quiet enough.
 I wouldn't even go there.

Good luck!

Hey Mike! I would think about building an isolation box. Check out the Paris
Q&A page for some ideas. I was thinking about building a box and racking
my PC and placing my mac below. On the fan replacement side you might want
to look at Stealth but, I don't know if they will work with a Mac.

Thank you gentlemen :-). After thinking about it some more, I think I'm
going to check out building an isolation box/extra mini machine room.

I've never owned a Mac, and have participated in any sort of discussion =
concerning Mac vs. PC.

When I last checked, the thread concerned fan noise and computer =
isolation.

So I'm really not quite sure what you're talking about.

Funny, but when I saw the thread title I envisioned you screaming at
Apple tech support over the phone! ;-)

David.

For what it's worth Tom, I got it. That's the first thing that came to my mind from reading the subject line also. "Mac Fans are Loud". I'm a Mac fan, and yes, I've been known to be quite loud at times. ;>) Oh well, I guess you had to be there.

i don't need no stinkin' phone to do that. ;o) once the weather
breaks (spring) i've got to get the shoot started to the mac hunt in
my back yard. i want to do a stop action movie of me chasing the mac
into the woods prior to it's execution. i do so enjoy being somewhat
demented.
