support any forward motion. Blog/wiki/networking/development rig are certainly part of that infrastructure but we also had a serious need for hard info - things like current community size and composition etc. If we want to tell outside developers who we are as a community, we better know who we are first, and I had the suspicion that my "spitball" guesstimates weren't doing us much justice.

research and detective work, and what I lack in skills I cheerfully supplement with grunt work. I wanted to share one of the results of that basic research with you all.

before. As far as I know we never got a definitive answer. We've now got a fairly firm "floor" for the size of the current PARIS user community. It stands at an eye-opening (at least to me) 125 current users - and rising, so

to an estimate of the user community worldwide (including PARIS users who don't come to the NG) as being in the vicinity of a healthy 400 current users.

Surprised? Not bad for eight years after discontinuation!

derived from a fairly accurate hand count of the number of currently active

is distinct from the size of the NG community itself. We needed that info broken out separately because while some developments (say the ability to open PARIS .ppjs without a PARIS rig) might indeed be of interest to ex-PARIS users too (who might still retain archives in .ppj format), other developments (say drivers) would really only be of interest to those who still have and use PARIS hardware.

To gather those numbers I ruled out the past approach of polls and censuses;

unreliable. I simply scanned through the NG posts going back an arbitrary length of time (10 months) and noted every poster I could in that recent

posting PARIS-specific tech support questions, specific error code questions, etc). I put the info in a database to sort it in different ways

so I could pretty confidently eliminate duplicates. It was a bit

would be counterbalanced by the certainty of undercount.

"minority case" - a returning user after years of absence - I naturally come

starting from here and going forward.

So while it's true we were larger long ago, a hard floor of 125 real users is a good strong number, an excellent number, for aficionado-driven efforts

than some aficionado groups for other pieces of discontinued technology, and some of those smaller groups have got quite a lot of very meaningful work done. And 400 users worldwide may not be Nuendo numbers but for small

Hope this is of interest!

- Kerry
