I've done an XP + paris re-install on my mac pro, and am now getting this error.

The title of the window is DBERR!!

"vcd_Open: failed to lock process gestalt memory!!"

After that I get an unhandled exception, and it crashes.

I'm not sure if it's related to the dual core, the expansion chassis or Paris.

Anyway, it seems these errors are shouting at me, but I'm not sure what they are yelling.. can anyone shed some light on what this means?

Cheers,

TC
