I am worinking with an R&B singer right now who loves the way I work on vocals, but he doens ont have a grasp on how the technology works.

So he has been giving me beats done in Fruity Loops (cool program)

Now I have this very young beat producer that works in Cakewalk but can't seem to output the beats.

Really this kid is good, but he just does not understand how to get me the beats from Cakewalk. Can anyone help me here as I have never even looked at Cakewalk. I'm guessing there is a track export feature somewhere.

C"uptown jimmy" <

The fix is not to let the 'blank track space' under tracks 17/18 show in the editor. AA

eapy, but it seems

> >pretty

>>> sturdy other than the knobs on the front which are cheap and plastic,

but

>Cakewalk, depends on the version as to getting the waves out - some didn't have audio, but I had to push the synth outputs back into a sound card - they will not record in the bounce until converted to a wave file. Existing wavs in the project will bounce. As I recall, the process was to highlight the track you want to 'render', and go to edit and bounce to clips / bounce to tracks. This will give it a reaaall wierd name and you'll have to figure that out by getting the track properties, OR keep the render folder open for the appearance of a new file and then move or copy it out. Kinda of a pain, but it worked and I was at at the time working on a client's machine w/o a manual... there might be a better way. You can also look on the net for the 'cakewalk audio finder', it's a useful tool as well if he's going to continue to work in CW. I would heartily recommend h

where can i find me a interface 2 cable
so i can hook up mec to interface 2
ThanksDoesn't the IF2 come with the cable attached? Mine did, I think?
```

Tony

They are midi files he needs to send me as audio. How do you record them
back as audio tracks? is there a patch bay type of thing? Sorry bout all
these questions. This guys seems a bit intimidated by the software and just
wants to "make beats"
Thanks to both of you.

```

low end thump bit seems super clear in the mids and has a nice crisp top. The d1 was close with a little less whomp, seems like the Audix line is fairly scooped. I have a d2 and it also has that clear sound going on, The 57 sounds so familliar, like every snare I ever mic up. I did not like the Blue at all.

On guitars I also liked the i5 but wonder if too much of this would leave a gaping hole in a recording, I also dug the 57 of course. could be the i5 on rythm and a 57 on lead would be cool. I was not impressed by the 609 at all.

The long road guy for The Who told me the 409 was way better. (they used 4033's on Simon Towshends acoustic amp)

Anyway, Thank you all for doing this stuff. I'm getting one of those Audix 15's for the next session.!

Yeah, but you really should use a ribbon...should this be in the *new BBQ* thread? Ouch, bad joke (slaps hand)

Seriously though guys... I cannot tell you how bad I've seen it around here

in Oklahoma. Chuck Wilson has it correctly from what I've noted, at least here locally. Nobody wants to spend money on the audio to do it right, and they readily accept two prong (read: not grounded much less GFCI) as the standard. I had considered getting into it at one point and was just in awe of the things I was seeing. Dropped that plan like a bad habit, because it's allll about not spending the money. Something like this was just bound to happen sooner than later, and I'm kinda surprised it didn't happen here in the buckle of the Bible belt.

The best way is to make Paris the slave, (to a timecode track).
Then use a syncroniser to lock them.

technically difficult piece. Good for him!

For all we know he may be painfully shy and this is helping him step out, not an easy thing. We don't know his inner dialogue. Note his sidelong grin to who? Mom? Lookit me! Music is a cool realm for kids to experience challenge and achievement. Adults too, for that matter.

As he builds on a growing technical viruosity and matures he'll have a rich vocabulary to draw on. Maybe at some point he'll create something that moves the skeptics. :^)

Cheers,
-Jamie
