
Subject: Can I use PARIS hardware with Wavelab Essential or do I need a soundcard

Sorry if this is a basic question.

I just installed Wavelab Essential to do some mastering. Do I need to get a soundcard or can I use the PARIS hardware with the ASIO driver for Wavelab?

If I can use the PARIS hardware does the Paris app need to be opened to do this.

Sorry for the rudimentary questions, but it's late and I don't feel like thinking.

Thanks,
Pete
