---

Hi,

I am a longtime Paris Pro user, and my old PC bit the dust a few months ago, and I am ready to buy or build a new PC on which I'd like to use Paris Pro with the XP drivers.

I currently use 1 EDS card and have a MEC with 12 inputs.

Can anyone recommend either an off the shelf machine, or the specs needed to ensure a good build?

Thank you much,  
Tom
