Has anybody ever seen this Error message: Error in initializing ParisEngine. There are not enough resources available." This is a real puzzle for me. I have been using Paris for 8 years, and have never heard of this .I cannot boot Paris at all...it seems to be related to plug-ins, but not sure...

Hi Zan,

Will Paris boot if you take all the plugins out of the VST folder? Have you tried removing all Paris files and re-installing it from the original disk? I do that periodically and find that things run better. Could it be a hardware problem? How many EDS cards do you have? If you have two try removing one. I'm not sure if that's the same message you get when a MEC isn't turned on. You might try re-seating all your connectors and cables.

Good luck!

Gantt

Error Initializing Paris Engine: Error Code 7/7
that paris can't see the EDS card

error 7/7 means

(1) The EDS Card is loose

-or-

(2) IRQ resource conflict

The MEC will flash until Paris has booted up, so that is normal.
You're turning on the MEC first right and giving it 5 seconds before turning on the PC.

Thanks John..it hasn't said 7/7 yet..but I will check those things out.The
weird thing is it was working fine,I didn't change anything or install
anything,,turned it off,went away for 10 days,turned it on ,then the error
message....

It's probably windows changing it's mind on what IRQs to assign to what hardware on startup. Drove me nuts.

I think I have narrowed it down the the EDS card in the computer...I hope it didn't get a power surge or something...maybe it's just loose...but I might be in the market to buy another one....
