Subject: Tracksheets
Posted by Edna Sloan on Sun, 15 Apr 2007 17:53:19 GMT

Anyone found any good software for these? Roll your own? I have some on
paper, but would prefer computer documentation. Would be nice if PARIS had
a snapshot feature of all settings, fx, etc.
Thanks,
Edna

Here's your best kind of Paris track sheet, and it's totally free and =
you already have the means on any stock windows install.... Do a windows =
screen shot.=20

  1.. High light the window you want to capture the visual settings from
  2.. press the Alt+Print Screen keys at the same time. This captures =
the screen item.
  3.. press the windows+r keys at the same time, opening the run box.
  4.. type mspaint
  5.. when paint opens press the Control+v keys. This pastes your =
screen.
  6.. Do this for any window you've captured: save as whatever you want =
(bmp, jpg, gif) from Paint. Name as you want.=20

Dammit Aaron stop giving away all the geek secrets!!

one more strike and your out of the club! Hand in your pocket protector
and slide rule at the door.
