Subject: New XP trying to load Paris 3.0

Hi,

I just recently got a new Dell T5500 PC (using Mike's suggestions) and put my EDS card in, installed Paris Pro and Mike's XP drivers, and while it seems that Paris installed ok, I can't get it to load.

Any help would be appreciated.

Thanks,

Tom

Hi Tom

Can you give us a bit more info?

What errors are you getting and when?

Did you follow the driver and Paris install instructions carefully?

In your device manager, is the EDS card showing up in the "system devices" section with no funky question mark?

Rob

I did follow the instructions for the Paris install and the driver install, and am getting no error message at all when I click on the Paris icon. It just sort of does nothing.

The EDS card went in easily, but it is not showing up under my system devices, nor is any question mark.

Appreciate any help you can give.

Sorry about that, yes I do see Ensoniq Scherzo in the Device Mgr and in the correct PCI slot.

Still not working though...I click on the Paris icon, get the hourglass for a second, and then nothing happens....
