Hi,

i look for an SPDIF interface wich can convert SPDIF in Optical ADAT.  
Someone knows something like in link below, but much more cheaper ?

[http://www.thomann.de/de/friendchip\\_digimax\\_1212\\_digital\\_pat\\_chbay.htm](http://www.thomann.de/de/friendchip_digimax_1212_digital_pat_chbay.htm)

or

<http://www.tcelectronic.com/digital-konnekt-x32/>

ThX

Dan

Well my friends, if someone needs more S/PDIF Inputs like me, look at this great one :

<http://www.friend-chip.de/dmx16dia.htm>

you can upgrade this onelike good old Paris

Best Regards

Dan

Try to find a SAM adat converter, conerts spdif to adat (1,2/3,4....7/8) and vice versa and has even level and pan control to mix 8 adat tracks to stereo spdif.

Hope this helps.

Regards,

Dimitrios

Hi Dimitrios !

Thx for replay !

Is it possible, to connect more the one S/PDIF connection into this SAM Coverter ?

Because i have 4 S/PDIF Synths and only 3 Mecs, to go digital into Paris.
