Hi guys,

am I right in thinking that your vst effects can't be organised in sub folders or paris won't see them?

I'm also getting an error on booting paris telling me it DirectX Wrapper - can't find the requested filter, Did you move the plug-in file?

This error has been coming up since I did this fresh install (V3) onto a fresh XP. Do I need a different DirectX version or something?

thanks

Kerr

aha, so the DirectX file is VSTDX.dll which is sitting in my vst plug ins folder.....that's what paris is halting on.

would I be right in thinking this is a .dll that vst needs and not paris?

I'm gonna try hiding it in a sub folder as VST seems to be able to address those, but it hides it from paris

tell me if I'm on the wrong path.....please?.....

ta

Kerr

so, can someone confirm my thoughts on Paris not seeing plugins when they're arranged into sub folders?

thanks
