Much as I hate George and friends, this wasn't a government decision though.

Of course it's a hard nut to crack. Much as individual property is important,
there is some form of stupidity when, in a city of 2 million people, you
can't have that ideal freeway because 4 people don't want to sell their house.
Of course many would say we have enough freeways, and a large part of me
very much agrees with that pretty strongly...

I am to some degree torn between the greater good, and the cherished private

property.

That being said, I wouldn't for a moment count a shopping mall as that important. I think you can fit the shopping malls in between everything else. A freeway, or a train line, or something like that, sometimes there's no choice, but a friggin' shopping mall, or a hotel complex? I mean what's with that. That does sound impressively like somebody wanting to make money.

There are times though when a very small number of people can inconvenience a very large number of people in ways that I don't necessarily think are morally right. As I said

[View Forum Message](#) <> [Reply to Message](#)

, I don't think the desperate consumer need for shopping malls fits into this though.

It is also possible that I don't understand the desire/need some people have

/>
to stay in one place. Indeed I'd openly say that I don't understand that at all. I tend to think it's refreshing to move, and I tend to think people who don't move would probably be pleasantly surprised and refreshed if they were forced to move (assuming they moved somewhere nice). Maybe I just don't understand people who don't want to move for whatever reason.

Still, like I said, I wouldn't make anyone move for a shopping mall.

Cheers,
Kim.

I have a Steinberg Pro 16 + hardware card for Commodore 64 for 16 midi tracks altogether that loads up in 5 seconds !
Does this count ?

 > >The thing I find amazing here is that this is the first time I can recall
 that my gut instinct is to agree with Thomas, Scalia, and Rhenquist - about
 anything. And disagree with Stevens. It's enough to make me want to check
 the details a little closer.

I'm also aware of the methods used by governments and developers and weathy
 landowners to get rid of "undesireable" tenants and multi-use blocks - mixed
 apartments and small businesses - to make way for big dollar developments.
 This decision seems to play right into their hands.

That said, this may be something I don't know enough about to comment intelligently.
 I've never owned property (well, I will in a few weeks, but that's another
 story) and I normally come down on the side of private citizens who hold
 out against developers.

But I've wanted to agree with DJ and Neil so badly on SOMETHING for years
 that I feel like celebrating.

-steve

As to the subject line, I've felt that way since Vietnam...

is that the rode classic.... the original.... with the tube and the outboard power supply where you change polar patterns.... and it has the goofy stupid shock mount?

i have one of those too.

i like its 3-d ness... and its great on most female vocals.... the one thing that annoys me is that ess's sound WAY to essy through it.

do you notice that and do you do anything to smooth it out.... what pattern do you usually have it set at?

Wow... you upgraded to Gold? Must work with Windows. I went to
Cakewalk 3.1. I use it to run Giga.

DOS all the way :-)

Tyronea monitor/keyboard/mouse switcher that doesn't make my monitor jiggle and jitter.

the jitter is subtle but its there and i notice it from time to time and it bugs me.

:-)

thanks!You should post a serial number. Wouldn't want that to fall into any hands here under the "b stock" items.

How good are your cables?
MikeAfter spending a bit of phone time with Behringer tech support trying to get
this thing happening, the final try using midi cables rather than it's
whizbang USB connection, they pronounced it DOA. I hung up the phone and
picked it up to disconnect the cables and accidentally dropped it.

It now is working using the midi I/O. I think they need to add some sort of
reference to gravity in the operational manual.

based DSP (WormHole Farm) and it works good.

GeneHey Steve,

Gld you showed up!!!!!! ;o)

<snippety snip from article>

"The city has carefully formulated an economic development that it believes will provide appreciable benefits to the community, including - but by no means limited to - new jobs and increased tax revenue," Stevens wrote in an opinion joined by Justice Anthony Kennedy, David H. Souter, Ruth Bader Ginsburg and Stephen G. Breyer.

http://www.oyez.org/oyez/resource/legal_entity/101/

http://www.oyez.org/oyez/resource/legal_entity/103/

http://www.oyez.org/oyez/resource/legal_entity/105/

Sandra Day O'Connor led the opposition. O'Connor was joined in her opinion by Chief Justice William H. Rehnquist, as well as Justices Antonin Scalia and Clarence Thomas.

A number of things are interesting to me about this. First of all, this would tend to fly in the face of the reasoning of those who tend to categorize those of the Republican ilk as being constitutional constructionists. There is only one member of the Democratic party on the supreme court. Four Republicans voted with her (Ginsburg), to throw private property rights under the train in order to allow municipalities to create scenario's under which the municipality can create additional tax revenue. This is a decidedly socialist attitude for a bunch of Republicans to be taking, if in fact all Republicans are neo-cons.

So much for party typecasting.

On the other hand, as you know, I'm a pretty conservative guy these days and have been a Democrat most of my life (I think Howard Dean is certifiably insane but if he would just rant about the entire political system rather than just the Republicans, I'd buy him dinner and drinks, but that's another discussion). In Texas I know lots of rich liberals, who happen to be mostly, but not all, members of the Democratic party so, in my experience, the Democrats aren't always champions of the poor and downtrodden, though, in some cases they are and in others' they would like everyone to believe that they are. OTOH, I know a lot more independent voters who are more likely to support the Republican party just because they more often come down against the kind of thing we see here.

It's ironic in so many ways that there are 8 Republicans and one Democrat on the Supreme Court and there is so much *party driven* fear amongst the opposing philosophical camps.

I predict that this ruling will be challenged and overturned if Bush manages to appoint another Supreme court justice, besides Rehnquist, who is pretty likely to retire soon. I think that it will be a good thing if it is overturned.

Unfortunately, as I've said here before, I see stuff like this happen on a pretty regular basis, not quite to this extreme but still, it's mighty close. As you know, I have a consulting firm here that literally keeps gas wells, gas pipelines and well access roads out of people's back yards. How can this happen? Because they were short sighted and didn't take advantage of certain safeguards that have been established for years, like consulting with attorneys and insisting on sellers providing them title policies which would tip them off to the fact that they are only the *surface owners* of lands which have been under lease to gas operators for years and therefore are subject to further and increasingly dense development as we continue try to diversify into cleaner natural gas as a viable energy source rather than refined crude oil.

Unless they take these time tested precautions, they have no way of knowing that their are two estates to the land and the mineral estate is as much, or more valid than the surface estate where they live. The owner of the mineral estate can lease this to a gas operator like Conoco, BP (formerly Amoco Petroleum) etc. and then this operator has not only the right, but the legal, contractual obligation to enter the premises and drill a gas well. The State of Colorado determines where these wells can be drilled and all of this is public record if these folks weren't so lazy, cheap and greedy that they would ignore something so important.

There are some states where the mineral estate can revert back to the surface owner after a period of time. Something like this could happen in this area if enough people would participate in the lawmaking process. It would create a more equitable situation, but it requires getting involved in the political process and staying involved, and this is gruelling work and time consuming.

My point to this minirant is that this stuff happens.....a lot more than people think, to one degree or another.

I tend to think that we often walk around like a bunch of sheep, depending on our elected representatives to cover our asses and then we bury our heads in the sand with our aforementioned posteriors in the air ready to get shafted.....how's that for a visual? ;o)

If *we, the people* are stupid enough to blindly trust a bunch of

politicians (doesn't matter which party) whose primary ambition is to play God while getting paid for it with our tax revenue, then we are as clueless as those folks that I see so often around here who suddenly find themselves screwed to the wall because they didn't cover their own arses.

Politicians, be they Democratic or Republican and big business are sharing the same bed and always have. It amazes me that we continue to be surprised by this.

Corporations are all about making money. They are conceived and chartered with the idea in mind of *zero* personal accountability for the individual shareholder and 99% of those shareholders, be they liberal or conservative don't care if a socialist concept or a capitalist concept enriches them.....as long as the riches keep flowing.

In this case, it would appear that the *socialist pigs* have won the day. The corporations have simply provided the money for them to do it.

Strange stuff.

:o)
