Subject: Paris Driver?
Posted by Ed on Tue, 10 Feb 2009 00:18:54 GMT

Hi. I haven't been following real close, but I think there was a thread or more about updating the Paris drivers to support the new multi-processors. I tried to weed back a few pages and I see nothing about it. Has this been accomplished? I have moved on to a firewire studio with a new computer (Dual Core 2 CPU), but many of my years of recording is with Paris and I'd like to be able to pull them up if needed.

Hi Ed.
Mike has a website which contains all his plugins and driver.
Go here:

http://ensoniq.ca

The latest build of the drivers can be purchased there.

If you want to try a beta to see if it may work for you,
you can search the NG for 'Beta", and you will find this:

 http://news.parisnewsgroup.com/cgi-bin/dnewsweb?utag=&cm
d=xsearch&group=IDEA.EMUEnsoniqPARIS&group=IDEA.EMUE
nsoniqPARIS&key=beta&action=Search+Xover

Apparently the beta worked well for most people, so it may be a good place to start.

Kim
