.....and the Purgatory ski resort about two weeks ago. The flakes are so big today they look like popcorn falling from the sky and all the trees and flowers are starting to bloom out while this is going on.

What an amazing show.

;o)

Been a weird month for weather here as well... two days of snow, then low 70's for a day or two, then 4" of snow, then two more days of T-shirt weather... etc..

The geese around here are flying in circles! :-)

David.

We're getting it over here today, too. Accumulating on the grass, melting on the streets.

Cheers,
-Jamie

a major highway there last night. I saw the flames from several miles away,
but the weather was great.
Gene

Did Al Gore show up for a photo opp, and say the fire was a result of global warming?

When he gave a speech and said the grass fires in florida that were caused by lightning were the result of global warming, the people wanted to run him out on a rail.

Sorry Gene, just cracking a joke, not looking for a debate;)

Hope you had a good time down there.

The planet is actually warming, according to measurements.

Could that trend make grass dryer and lightning more common in some areas? Possibly.

But the main thing to realize is that a warming planet will experience a variety of changes in climate, influencing things like weather and average sea level. Some of these changes may eventually make things difficult for various species, including our own.

This is true with or without Al Gore.

But joke away anyway, Al probably has a pretty thick skin by now.

Cheers,

-Jamie

Jamie, ever bin to Florida at different times of the year? Florida has had dry grass, pine needles etc., and these kind of fires for years, it's nothing new.

Looks like I picked a good week to go to Phoenix

to watch spring training baseball (my 8 year old son is a big Texas Rangers fan--he caught a fly ball on Monday and got Sammy Sosa to sign it yesterday)...

Being "nothing new" doesn't exempt a type of event from being influenced by global warming. With the level of warming we've seen recently, we're not talking about creating new types of events. We're talking about changes in the frequency and distribution of familiar events that are climate driven.

So, for example, we may see dryer forests and more forest fires here in the Western USA. Higher average temperatures and shifts in rainfall can contribute to that, and those are climate driven and thus susceptible to being influenced by warming trends.

It's difficult to pin any specific event on global warming because there are other shorter term factors involved. But over time we may see patterns of increases and shifts that may not be accountable by other cycles. These patterns are easier to see after time passes, looking back.

So we may indeed find that Florida fires and/or lightning strikes are increasing in a way that tracks with increased average temperature, in which case AI may be right. Or we may find that Florida is instead

getting wetter, fires are decreasing and THAT may be an effect of global warming. Or we may find that the fires are more influenced by a shorter cycle variation, like el nino or some other climate cycle.

In short, it may be too soon to tell if some aspect of the fires are currently being influenced by global warming yet. But I wouldn't rule out the possibility.

Cheers,
-Jamie

i'm sure it's pretty but pleas keep it there. it's just starting to
get nice around here.

thanks

I did have a good time, thanks.

to:
<http://www.columbiarestaurant.com/ybor.asp>

A little touristy but highly recommended.

The fire was a gas truck that caught fire on an elevated highway. No Global Warming involved as far as I know.

has been involved in a multi-year publicity campaign of disinformation, and most people cant help but believe what they are told by our government, particularly

Gene -)

It stopped yesterday afternoon and all melted. We've got 4" on the ground this morning and it's still snowing hard, and I mean like as in a January snowfall. I'm glad we didn't curry our horses last weekend. That removes their winter undercoat and they're needing it today. I had a feeling it would be a good thing to wait. I was right. They're out in the pasture right now looking around wondering where all the green grass is that they were munchin' on yesterday.

Time to go throw some hay at these guys
;o)

itinerary. Berns Steakhouse did make the cut, as did Dempsey's Steak House

Gene

Dude! You went all the way down to Tampa for dinner and didn't go to
Bern's Steak House (<http://www.bernssteakhouse.com>)? That's just sad.
I garowntee you that if AES is ever in Tampa, that's where we're

having the Paris dinner!

> curry our horses last weekend

In India, would that be considered sacrilege? I understand the spices would probably make it more palatable at least.

AA
