
Subject: Question about VST wrapper...

So, if I've got VST effects working on my Paris system, should I bother trying to wrap them? I've noticed that things like meters on VST effects don't work, but the effect still seems to. Does the wrapper make the fancy lights and stuff work on VST effects?

What are the preferred options for general wrapping of VSTs?

Sorry for the dumb questions, I'm just trying to get my head around it.

Scott,

Yes the wrapper will fix the GUI of most plugs. My UADs are still showing meters with latency though.

Tom
