Hi All,

I have been using Paris on a Win ME system and have been reading about running Paris in Win XP with Mike's drivers. I am thinking about an upgrade but I have a few questions.

Are there any problems installing the EDS 1000 cards in the newer Pentium core 2 or icore PCI slot?

Will Mike's XP drivers work using Win 7 (Ultimate/Professional) in XP mode?

Wishing you a safe and Happy New Years 2011!

Inkyku

I am running Paris on Windows 7. You don't need to run the XP emulator. In fact, I don't think you can run it in XP mode because the virtual machine will not see the EDS cards.

See here: <http://kerrygalloway.com/ParisForums/index.php?t=msg&th=14991&start=0&>
