sis May 03 and I'm
pretty much back to feeling normal!!
I've got a Bundle-3 and OPcode Studio Vision Pro for MIDI.
DJ was kind enough to give me his old Opcode 64 XTC
MIDI interface(THanks again Doug). That and my old Kurzweil PC88 All running
on a old B&W G3 400,
and now I've got my own Studio of the living dead.
The G3 is kind of finicky(spelling?)so I'm looking for
something cheap to replace it.

respect
Nappy
