Hello,

I was wondering if support@intdevices is still responding to requests for a response code when you reinstall Paris 3 to a new computer. And if not what do you do?

I reinstalled it to a new computer and I thought that I got at least 2 weeks to use the new system before the code was required but it didn't even offer that option. I'm not able to use the system at all until I enter a response code.

Thanks for any help and info in advance Carol

It's taking them a while, but a friend just installed v3.0 and they got back to him before the expiration.

The expiration is usually one week. Not sure what happenned there.

Cheers.

Kim.

The computer explodes. It usully starts to smoke and sizzle a few seconds
before so there's time to make a run for it.

Hi Carol,

I just went through this a week ago when I upgraded from a G3 tower to a G4 Quicksilver machine. Even though I moved the hard drive containing the "authorized" version of 3.0 to the new machine, PARIS would not run. Got a message stating that "The trial version of PARIS has expired on this computer" or something like that.

I emailed off the Challenge codes to ID, along with some friendly words, and got a reply in about five days. So, they're still there. Be sure to send them your EDS serial number and 3.0 license code or they will not give you the response codes to unlock 3.0. I believe that you can rename your PARIS folder and reinstall 3.0 from the CD to get a week of use.

Hope this helps.

Mark
