HI all--

somehow I lost my library of effects when reloading paris--
don't ask me what i did-- moved something somewhere where
i couldn't retrieve it i guess--

how do i get my library of FX back into my system and still retain my presets(which
remain in the projects themselves)?

thanks

jp

Globals are in PARIS_FX.VAR. If you have them in the projects you can load
the project and move them to globals.

LIBRARY presets are saved in the PARIS_FX.VAR file
in C:\Program Files\Paris3 (your Paris root dir).

PARIS_Fx.var (Default) is a backup of the file
PARIS_Fx.var that gets modified when you make library presets.

John,
thanks for the explanation...

am i correct in thinking that i can rename

my PARIS_FX.VAR(default) to read PARIS_FX.VAR and use that to replace my current PARIS_FX.VAR file and find the library of missing FX? do i need to do something particular to avoid losing my own presets?

thanks again,
jp

Your global effects were in PARIS_FX.VAR. If you overwrote this file without backing them up they are gone. If you have them in project files and not in global effects you can then just add them back into global by opening one project at a time and pushing them into the global area. Then backup the file PARIS_FX.VAR.

The default is just a backup of the original paris presets before we add any.

john--
once again, thanks
i'm a slow learner i guess
even though i've been working with paris for 7 years or so...
cheers,
jp

I too have been working with paris for about 7 years and don't know jack.
Even learning how the aux can be stereo was new to me and I have read the manual in its entirety multiple times and continue to dink around in Paris.
It's truly an amazing app.
