same computer like cubase...  
There is a plugin FREE one from Voxengo called recorder, [www.voxengo.com](http://www.voxengo.com).  
This can record (output) sound as a vst plugin to mme devices.  
So if you install virtual cable (do you remember this ?) you can output  
recorder track to virtual cable 1 and let cubase record cable in 1.  
The only thing (just tried it) that I get echo on recorded track.  
So somewhere there will be a solution on virtual cable preferences to  
overcome.  
Interesting enouph.  
Regards,  
Dimitrios85 000 people and no major incidents, amazing.
