I bought a used ADAT card a while back and didn't install it until a month
or so later. All of the lights come on, but it doesn't show up in the patchbay.
I have tried different slots, different MEC's, etc. to no avail.

Has this happened to anyone else? I suppose the ADAT card is defective. Anybody
know if thesoniq still repairs Paris stuff? Any experiences with them?

Thanks,

TD
