Thanks for your help Dave.

All looks, and works good here now.

the only thing is that big ben stills says output 2 (going to mec1) is not terminated. but i suppose thats because we have it daisy chained now.

thanks again,

jeremy

to reinstall xp pro edition and as you guessed no help there. Now when I launch paris and close it and turn the computer back on I am seeing the microsoft has encountered serious problem would you like to send this. So that is about it. I have quite a few session to do and three or four prj to mix and I am in trouble. I certainly appreciate you all and the news group. I don't post much at all, but what would we do without having the newsgroup. David PSome thoughts below:

Use only NTFS throughout... avoid FAT32 on XP (personal nightmare here). Which build of XP are you using? How large is your PSU in the computer?

> I swap over to xp with the purchase of this computer about a year ago. The

Some functions on the C16 do not operate correctly unless that C16 had been selected as default last. Typically, only the faders and channel select/mute buttons remain with the subgroup selected. All other functions on the C16's control the last submix selected.

The

> other problem was that I would open a prj and there would be no audio for

There is an unusual amount of wait time for the software to boot under XP, the more hardware you have, the longer the wait. Our system here takes almost 90 Sec to settle down on loading a project. This is normal under the XP beta driver.

Several

> ago the computer started crashing and I would get the exception error, no

Did you do the complete Paris install with the FX subsystem files etc?

I have quite a few sessions to do and three or four prj to mix and I  
> am in trouble. I certainly appreciate you all and the news group. I don't

I was actually suggesting a total nuke and pave, much more reliable  
than converting a drive.

DAVID, from Canada... eh. ;-)

Nah, although the spectacle of the Jethro Tull metal award years ago, makes it almost worth watching just to see if another complete trainwreck happens, but no it just isn't worth it

DCDid you guys see the Royal Albert Hall Cream concert?

Here in the US it has been on public TV recently. Dang, those guys can still do it. They look like hell, but man they are playing great.

I never realized how truly impressive Jack Bruce's bass playing was years ago. During solos, he actually brings them close to great jazz with these amazing bass parts.

I really enjoyed that show. Hope you got to see it.

Tony will post some MP3 and Wav files that were Recorded By  
Roger Nichols for NARAS  
( National Academy of Recording Arts and Science )  
<http://www.rogernichols.com/>

Here is the Challenge - there are 5 mics in the Shoot out:  
TELEFUNKEN U47  
SOUNDELUX U95 (AKG C12)  
SE GEMINI  
SE 5600A  
SE ICIS

These are all Tube Mics - The Telefunken and Soundelux  
cost Thousands \$\$\$ More !!

Listen to the Samples - then Properly identify the Mics in order.

[http://www.mercysakes.com/paris/Morgan%20Pettinato/Mic%20Con test/](http://www.mercysakes.com/paris/Morgan%20Pettinato/Mic%20Con%20test/)

You can open any audio app and imort the wave file in order -  
or listen to the NUENDO Mp3 file ( Last one in directory )

Anyone that can Properly identify these Mics will Win -

SE Microphone Deluxe Windscreen \$ 59 Value  
<http://www.seelectronics.com/popscreen.html>  
Planet Waves Mic Cable \$69 Value  
<http://www.planet-waves.com/Pcablesdetails.aspx?ID=2>

Files are posted @  
[www.mercysakes.com](http://www.mercysakes.com)

Good Luck !!

Please send your entry to:  
[Morgan@Eastcoastmusicmall.com](mailto:Morgan@Eastcoastmusicmall.com)

Any questions - Call or Email me

Morgan  
Eastcoast Music Mall  
800-901-2001 That sounds like a very collectible recording tonehouse. Have you circulated

it as a boot? Are there any other bootleg recordings in circulation from that date?

>There are sometimes you have a device like an AD converter or an external hardware device that although it has digitalins outs it does not have any wordclock in/out.

I suggest Behringer's old SRC-2000 dejitter,converter unit that has wordclock input so you can put the digital signal first into that device and have it reclock to desired 44.1khz and then take its spdif to Paris.

Another nice addition is Soundpals ADAT3 and 4.

This is a AES/EBU to ADAT converter with wordclock in out.

I picked both at ebay at a very very nice price.

So I can take the AES out of my DBX 376 the AES of AES 386 and the AES of SRC-2000 that accepts a great self made crystal AD converter of 120 db dynamic range ! spdif's out and sends all these aes/ebu signals to ADAT and

inside Paris.

Note that Soundpal's Adat4 is a ADAT to AES converter and both are 20 bits

!!

I guess these have been made for Paris adat cards !

Regards,  
DimitriosHi Neil,

I don't think there's any way to know how much I lose for not having PT. I sometimes wonder how much business I lose for not having a Steinway too (I have a Baldwin...). I do, in fact, have PT LE w/ a Digi 002. When people ask, I tell them that I have Protools and Digital Performer, but I usually use Paris because it sounds better.

Maybe business is just off in general. I've actually been taking some courses in video production and engineering. Could be time for a career change!

By the way... My website is finally back. No audio samples yet, and it still needs some work, but here 'tis:
