Hi guys, I just put my old Lexi studio system up on ebay. This system, after
a bit of a fuss to get installed under win98, will give you two sweet
sounding Lexicon verbs.

 http://cgi.ebay.ca/ws/eBayISAPI.dll?ViewItem&item=170318 137003

Thanks
Rob

Rob,

I have one of these that I've been mucking with and suspect a problem in
either the card or I/O. I used it from 1998 until 2003 as a stand-alone
reverb, like you describe. Then I retired it (unplugged it, took it out of
the box etc) and when I put it back together, it was weirdness all around
(clocking, hissing etc).

I'll buy yours if you know that it works and can help me set it up.

Sandy
