About how much would it cost to put together a Paris rig?

I have no current Paris gear, nor do I have a computer that can run Paris.

I'm looking for a breakdown in cost like for the best paris rig i.e fastest cpu/mobo/ram that has been known to be rock solid, magma chasis prices?, current prices for paris gear i.e mec, inputs, adat, c16, edc?

I'm looking to have 32 inputs and would kinda like to know what budget I would need.
