OK, after umming and ahh-ing a bit...

The GNX4. ;o)

A few people will have been watching my journey with this beast. I bought this pedal mainly for use as a looper. You can record 8 tracks, then mute tracks, unmute tracks etc. It has a drum machine for you to play along with which it stays (naturally) in time with. All in all this little beauty has almost single handedly got me playing regularly again where no other force in the past decade or so has been able to do so. The ability to create instant backing tracks and then solo along is WONDERFUL! And while I do love Paris, the fact that there's no boot time or shutdown time is the best thing ever for inspiration. There's something about just walking into the room, flicking a switch, waiting 2 seconds and starting to play... there's something about that which free's the creative spirit. Recording isn't a chore, it's easy, instant, simple, and controlled by your feet while you play. Of course it will never do what Paris does, but it really has been a huge inspiration to me.

And what's more, the thing also does a zillion other effects, including a fandangled amp and cabinet emulation which allows you to combine the sounds of any two amps together into a single warped sound... plus doing delays, mod effects, reverbs, vocoders, wahs and whatever else... all of which is just a bonus to me which I haven't even gotten to yet. Every time I use it I find myself just recording backing loops. I LOVE IT!! ;o)

Of course I'm biased because it's my newest toy... ;o)

Cheers,  
Kim.
