Subject: EDS Plugin Presets?

---

After three days of struggling to get my old G4 running w/ PARIS again I should just be grateful to be back to work, right? Except that for some reason I've lost all of my EDS effects' presets - both factory and the ones I've created. Anyone know where those guys live? I have PARIS copied to two other volumes in the same computer so one of them must still have my presets if I only knew where to look!

Thanks!

Gantt
