Well, it's been a lot of work, but I think it's pretty much there.

We still need to test out the MTC synch. I put one data lock on it, but I think it needs one more, maybe two. If anyone has a way to test that, I'd really appreciate it. I thought I could sych it to Cakewalk 9, but it only outputs midi clocks.

All the best,

Mike

Hi Mike - if you've got REAPER on hand, the process for getting it to output MTC is detailed in this thread:

<http://forum.cockos.com/showthread.php?t=24422&highlight=MTC>

I'll try it myself when I'm in a situation to do so.

- Kerry

Thanks for all this cool stuff your doing Mike! I don't have a dual core yet. May have to build one now. can I use this with my single cpu, to get the adat modules happy?

Hi Rod,

You bet! It will leave a bunch of log files in your c drive that I'm using to debug. Just delete them once in a while. As soon as I figure it's done, I'll remove the code that makes them and release an update.

All the best!

Mike

Mike no dual core here either to beta test on, but now I'm considering building one. Jeez I just got finished building a new single core machine for Paris. Thanks for all your slaving dude.
