I have an interface MEC cable, but it's too short.

Shall this longer one be compatible between EDS and MEC ???

http://www.ebay.com/itm/146776-004-Compaq-12-foot-SCSI-2-mini-i-50pin-to-mini-50-pin-External-Cable-for-/231100934668?pt=US_Drive_Cables_dapters&hash=item35ceb06a0c

Years ago I purchased a 14' SCSI cable from another Paris user that was used with his Paris set up. I've never tried the cable myself, but I believe it will work. If you buy them please let us know if they work.

Good luck!

James

I use 2 Paris MEC with 71' SCSI Wires. And works without any problems.
Hope this message helps.

Dan

71' sounds not quite right since that's over 20 meters

Oh Sorry, i found a table which contains meter and inch . I use 1,8m long SCSI-cable. I read

anywhere, 6m is max for SCSI 1 and 3m for SCSI 2. SCSI 2 works with Paris.
