Has anyone used Paris and IK Multimedia's Amplitube? I keep getting = crashes (With version 1 or Amplitube and V2.2 of Paris). I have gotten = it to work, but only once or twice and the rest of the time it just = crashes Paris on startup or when I try to use it, furthermore it always = causes my computer to reboot.

I am thinking about going to Paris 3.0 if this has worked for others, = but I hate to spend that much money when I could put that money = somewhere else in my studio.

Thanks,

Erick,
I use an early version of Amplitube with Paris 3.0=20
on a PC and it has never been a problem. I don't
think I wrap it but I forget now.
