---

Folks, I know this group is for Paris, but I am working on a project and I am having issues I am hoping someone can help or direct me to the right place for help.

Are there any Sonar gurus out there? What's going on is... I have a few .wav files that I imported into tracks in Sonar 7. When I play them back, I hear constant clicking, almost crackling on some of them. Especially on one that is an acoustic recorded on a open mic. Almost sounds under water. I thought something had gone wrong with the files.

So I imported them into Cubase (on the same notebook) and believe it or not, they were clear! I also pulled each file up in Cool Edit and same results... clear as a bell.

I went back to Sonar and tried to debug. First, I turned off the midi connection (I don't use midi)... but other than that, I can't for the life of me, figure out what is causing this noise in my imported clear files.

I haven't tried to track anything yet to see if I get the noise... but I am hoping someone can shed some light. I am brand new to Sonar. Anyone?
