Hello All,

I'm looking to try and install Paris Pro.

I took every thing off the computer inducing Paris 2.1

My computer is running Windows XP with service pack 3 installed.

What is the proper way to install 3.0, mikes driver update.

I'm getting a black screen and a reboot form the computer.

So I know I need to take the 1000 card back out of the system and install the software first.

Mike A. was talking about using his installer to do this.

Where can I find this at or is this his XP & up drivers?

Help - Thanks - Jeff
