thanks are appreciated...

Perhaps we should make this official Chuck Duffy Day? Where we remember all
Chuck has done for Paris. :o)

Cheers,
Kim.

Dimitrios

At down of this page my Chorus presets.For mono much of variations for el.guitar,
cabs simulators, tremolo ...
Chorus stereo (Aux) with leslie presets.

Best Regards

 Zmora

am by mushkin. this ram was recommended either #1 02 at
every mac site i visited prior to buying the G4. ironically it turned
out that no mac service center had an accurate test for ram because
apple didn't have one. though months late in coming this info did
finally prompt me to purchase another band which did work better. i
should mention that i had in the mean time swapped out my ram with 2
other G4s with apple supplied ram that had not solved the problem.
mine worked in theirs while theirs didn't in mine. this i suppose is

why they kept replacing the other guts in mine.

after that then another issue arose and that was FW800 incompatibility
which apple says was the fault of everyone else. well, we all know
the answer to that one. that issue was more or less resolved by th
other manufacturers with the updates to their gear. for best
performance i still have to use FW400 for the audio drive and the 800
for storage...cool huh.

at present i'm on 10.3.9 which is now functioning the best since my
purchase. since my rig was more of a G5 than a G4 all those little
changes to take advantage of the 5s architecture performance and
stability have improved. i can sill run more tracks (on SX), plugins,
and vst instruments on my 3+ yr. old 2.6 P4 pc than i can on the mac
but the gap is closing.

"The statement that they (Apple) can't warranty it working with third
party products is unreasonable, you have a reasonable expectation of
it working when you bought it" true or not it's apples position that
problems are yours and not theirs. after all, you own a mac which is
like being a part of the second coming so it must be your fault.

all of this comes too little too late for me. it's sad, it took me 10
months of 16 hour days and a couple buckets of money to build my
studio. add another 6 years of 16 hour days building the business to
where i was making pretty good money. then came the mac and after 2
plus more years of trying to keep my dream alive i threw in the towel.
my wife and i plan on moving to oregon in about 3 years and i don't
wish to take 2 of those years to try to rebuild a client base and
reputation only to leave it when we move. so there you have it, i'm
just plain out of grease.

rick, sans his inner child ;o)
