Yes I did. These people (unlike me) are EXTREAMLY legal minded people. Lending software, regardless of being LE or not they really shy away from. Is there a trial download of it somewhere for the MAC G4?

Hi Steve,  
No demo version. Yes stupid but true.  
If they go to the Help and about window in Cubase LE and it is version 1.02 or higher then it will definitely do audio. It will depend on them at that point to get a sound card with a ASIO driver so they have proper audio support.
