school and interning at Island Record's label called Smash records: where
anything but a smash was intended. We worked hard, they kept everything as
the lowest priority...they just didn't tell us. Then, while working at
Elektra Entertainment (outside Chicago) I met some of the senior people at
Warner, Elektra, and Atlantic (WEA) who lived it from the late 60s through
the 80s and they explained some things to me. I've seen the "modern way"
during the 90s in action and I've been following things now. Mr. Spitzer is
going to find a huge mess if he keeps investigating this further. This biz
with sony/bmg is not the only thing going on.

Well, that was the only time I ever discussed it with anybody that was
there - 1st hand. Because I became good friends with them over the years. I

don't know where anybody discusses this stuff openly on the web. They were
all pretty tight about never having anything in writing and never leaving a
trail.

 asking me to fix it at the board, for instance is enough to make a
guy crazy when he's trying to ride herd on all of it.

I'm thinking about getting a Sytek or maybe another Forssell JMP-6 or Great
River MP4. I've either used these, or am familiar with them and they are all
majorly nice preamps. The Sytek especially is a major bang-for-the-buck
item, but I've also been wondering about a John Hardy 4 channel, True
Precision 8, Focusrite 428 and a Focusrite RED 1. I'm looking for
transparency/true to the source rather than color.

I'll be getting a small chunk o' change soon from a production I'm doing
here. Anyone ever used any of the aforementioned pre's?

Thanks,

Deejhttp://www.kissthisguy.com/

It's all about misheard song lyrics - way funny!

-Markusi've got the true 8 and it's mostly used on the drum kit...toms, hi
hat and bottom snare. very similar to grace pres in sound. they're
also set up for MS.
